

Make a poster!

**Draw a line from the facts to the poster &
draw a line from the myths to the bin**

1. Having sex while standing up prevents from pregnancy.
2. Washing yourself immediately after sex prevents pregnancy.
3. Having unprotected sexual intercourse, regardless of the position, leads to pregnancy.
4. You can only prevent pregnancy by having protected sex, using a condom or a form of contraception like the pill, injection or IUD.
5. Having sex with the penis only partially inserted in the vagina prevents pregnancy.
6. Having sex during your period prevents pregnancy.
7. Jumping up and down after sex prevents pregnancy.
8. Once you have unprotected sex you cannot stop the sperm cells from fertilising the egg
9. The use of contraceptives makes you infertile.
10. Only the use of the pill or an IUD will prevent you getting infected with a STI or HIV.
11. Sexual intercourse during your period does not prevent pregnancy.
12. Having unsafe sexual intercourse for just once does not make a girl pregnant.
13. Only a condom protects against sexually transmitted infections (STIs)
14. Before the boy ejaculates, sperm can come out of the penis. When the penis enters the vagina, there is a risk of pregnancy.
